

Vortec Warranty

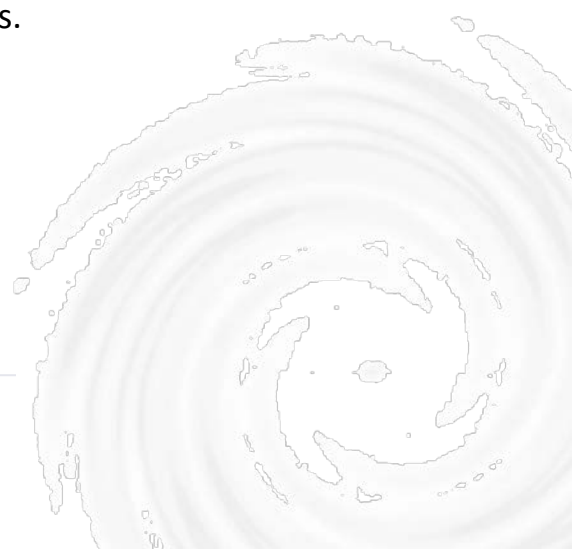

All Compressed Air Products manufactured by Vortec, except for the products listed in Appendix A, are warranted for ten years after date of shipment from the Vortec factory against defects in materials or workmanship under normal use only to customers for use in business or original equipment manufacture. This warranty covers only the pneumatic core product and does not include other components or accessories, such as hoses, filters, diffuse-air vests, ionizing equipment, etc. Non-pneumatic components and product accessories are covered by a two-year warranty on the same terms above.

Any product which is returned to Vortec with shipping cost prepaid, and determined by Vortec to be defective in material or workmanship, will be, as the exclusive remedy, repaired or replaced, at Vortec's option.

The above limited warranty is Vortec's sole warranty. Descriptions in product literature or other print or online media are not warranties. No warranty of affirmation of fact, express or implied, other than as set forth in the statement above is made or authorized by Vortec. Vortec disclaims any liability for product defect claims that arise from product misuse, improper product selection or misapplication. Vortec makes no warranty of merchantability or fitness for a particular purpose.

Customers should contact Vortec at 1-800-441-7475 if there is any question on the terms of the warranty coverage for any of its products.

Vortec is a business unit of ITW Air Management.

Appendix A
